

James' soccer passion requires he watches all of Liverpool's soccer games. Next week's game is coming up soon, so James checks online to buy his ticket.

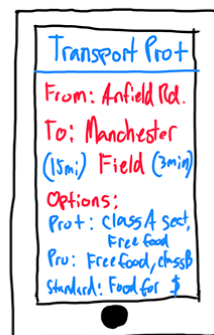

Tickets are fairly priced, but James has no choice but to get the VIP Access ticket. He makes the purchase thinking that will be his only expense for the game, after all, free food is included!

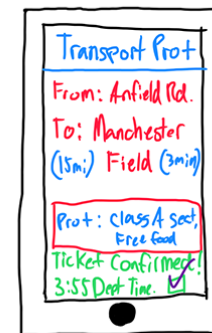

James then plans when he should leave his house for the game. He realizes that it is too far to walk. He does not own a car and taxis are overcharging due to a lack in business. James decides to research an alternate form of travel that is worth its price.

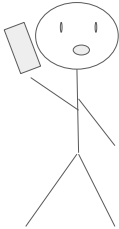

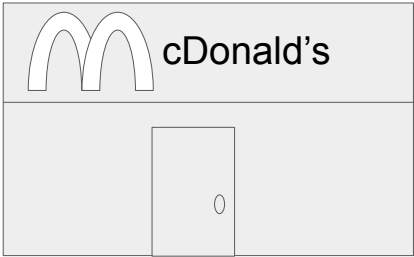

James found the TransportPro+ app that uses high speed rail tracks to support the community by providing national travel at a competitive cost. For only a couple dollars a month, James can use TransportPro+ services and utilize their benefits!

James simply input where he needed to go and where he needed to depart from. There is a new Transport station just outside of James' apartment, so walking is not a problem. James purchased the Pro+ plan since he likes free food and good seating. He simply selects his plan, and confirms his ticket.

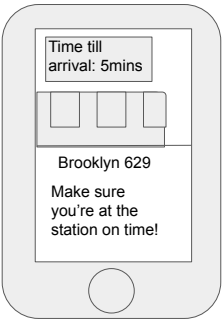

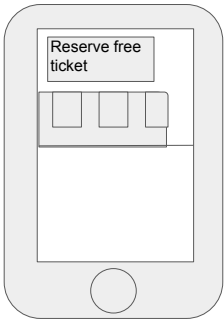

James confirmed his ticket and is all set for the game! Thanks to the Transport app and his Pro+ plan, he can make it to the game without taking a several hour walk or expensive taxi trip. The Transport app can assist thousands of users like James.

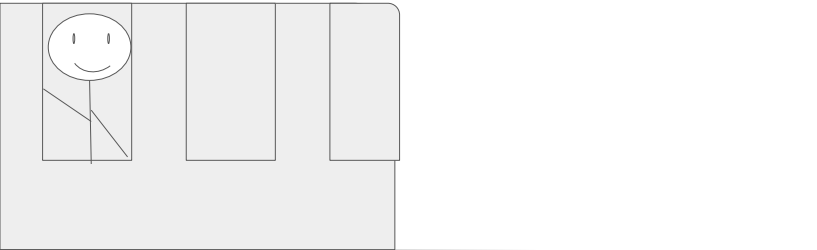

Jimmy wakes up every morning and walks 5 miles to work at his local McDonald's. His feet ache by the end of the day. He needs a free and efficient way to get to work everyday.

His dad calls him and tells him about a new app that gives him easy access to free and fast transport.

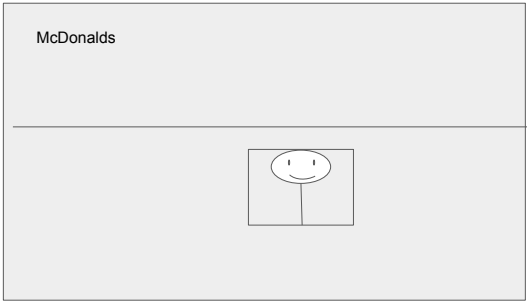

Jimmy opened the app and selected to reserve a free ticket on a high speed train system

Jimmy was prompted with the time till his train arrives and where to go.

Jimmy gets on the train and has a relaxing, enjoyable ride to work

Jimmy is now able to be happy and rejuvenated at his cashier job since he no longer has to walk long distances to work

Fredrick is telling his neighbor about wanting to plan a road trip to Yellowstone National Park, but he's struggling to find the best route on a map and plan out a schedule. He also doesn't want to use an app because he isn't great with technology.

Fredrick's neighbor tells him about a simple and intuitive travel app which can do it all for him and tell him the most comfortable and affordable option for travel.

Fredrick downloads the app and puts in all his information.

The app gives him a variety of options about what would be most comfortable, fastest, most affordable, etc.

Fredrick now has a travel plan and schedule which matches exactly what he needs from comfort, speed, affordability.

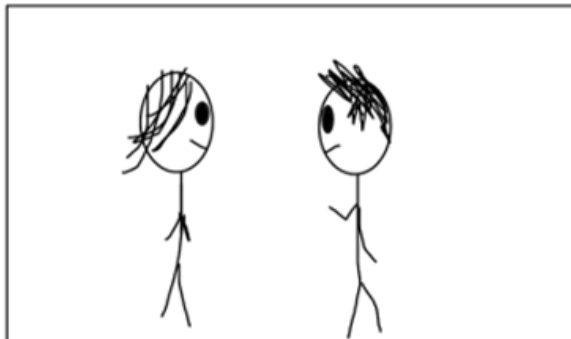

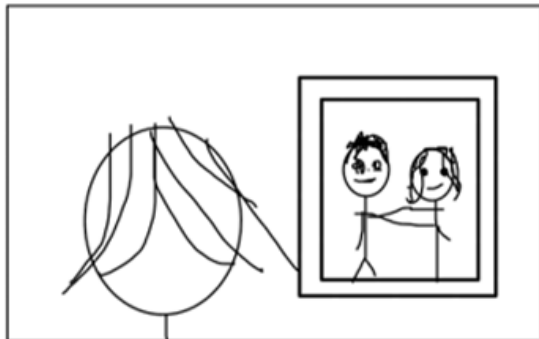

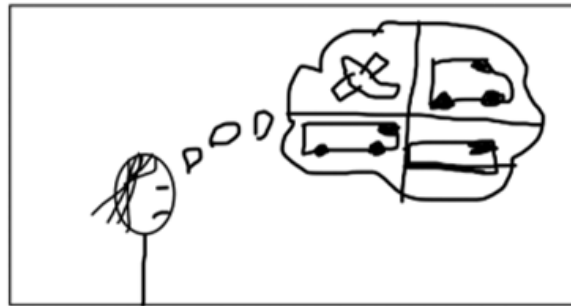

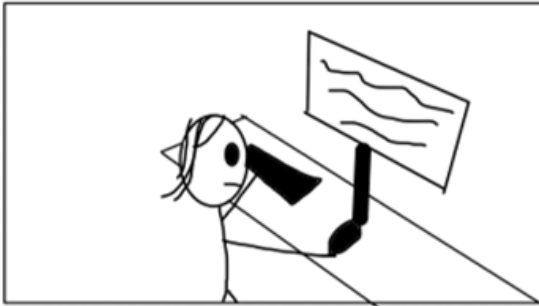

Fredrick and his wife are able to enjoy a nice trip to Yellowstone

Monica was slammed with work for a few weeks straight. Looking forward to her days off, she begins to think of how she could make it home for a visit.

But every way she thought of was either too inefficient or expensive.

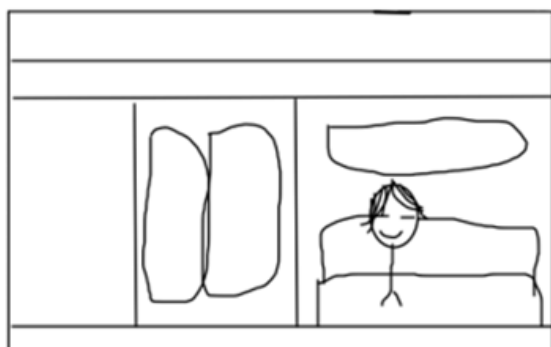

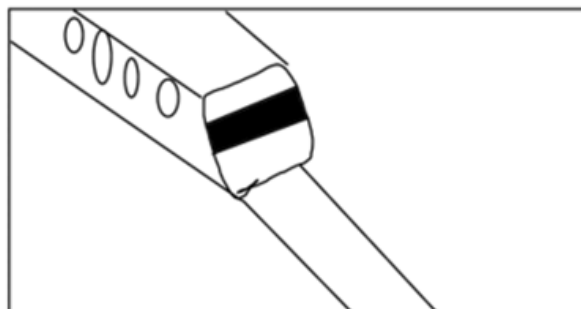

Noah Weyer

She really wants to visit her parents, so she needs to find away to get from LA to Pennsylvania that's efficient and cost effective.

Her friend Jeremy tells her about how easy it is to get a ticket on a high speed train using an app that can manage and schedule your trips.

Using the app, she books a a train ride home for the following weekend

Monica is now happy that she has an easy and affordable way to visit her family
